Letter of Recommendation for Valley Video Professionals

My husband and I hired the Valley Video Professionals team to capture the memories at our wedding on September 1st, 2012. We were more than satisfied with the service they provided. The whole process; before, during and after was a very pleasant experience.

They promptly returned our calls and scheduled a meeting to discuss our needs. They made us feel comfortable and listened to the style we wanted for our wedding. They arranged their schedule to be able to attend our rehearsal. They also met with our parish Priest to learn about the restrictions and allowances of the church. They were able to make a plan that worked for our needs while respecting the limitations of the church. They were able to relieve any worries, and I knew the day would be captured perfectly.

The day of the wedding their professionalism was very evident. They were set up and ready to go before any guests entered the church. They captured the day wonderfully without being in the way. The microphones they provided were able to capture even our quietest vows. They interviewed the guests with such respect and made sure to get all of our treasured loved ones on tape. Many of the guests commented on how they barely noticed the team around the festivities.

Our final product was not only done in a timely fashion but also was of great quality. We were very happy with the quality of the DVD's and of all the images that they captured. It was amazing to be able to sit back in the comfort of our home and watch the footage that on the day we were too busy to see. We know we will cherish the messages from our Grandparents and older relatives who will not always be with us. Our wedding DVD's are truly one of our most cherished wedding souvenirs. Once the day was over, the cake was gone, the dress went into a box, the flowers had died but we will always have our photographs and our DVDs to remind of us our special day.

We would highly recommend the Valley Video Professionals Team to capture any special event in your life; and to capture it with a respect, quality and with a unique flare.

Sincerely,

Paula + Keith Simon
